

Banglalink Network Measurement SDK Migration Guide (v1.0.5 → v1.0.9)

Migration from Banglalink Network Measurement SDK **v1.0.5** → Banglalink Network Measurement SDK **v1.0.9 (Unified SDK)**.

1. Objective

This document outlines migration steps for upgrading MYBL integration to the latest Banglalink Network Measurement SDK.

2. Migration Scope

This migration covers the transition from:

- Network Measurement Unified SDK (v1.0.5)
to
- Banglalink Network Measurement SDK (v1.0.9 – Enhanced Version)

Scope Includes:

- Upgrading SDK dependency from v1.0.5 to v1.0.9
- Aligning integration with the enhanced Banglalink SDK guidelines
- Refactoring initialization to follow strict lifecycle binding

Initialization migration process (Fragment).

Version-1.0.5

```
private lateinit var networkDataUploader: NetworkDataUploader

override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    // Initialize SDK for fragment
    networkDataUploader = NetworkDataUploader()
    networkDataUploader.init(this.requireActivity() as AppCompatActivity, "MyBL")
}
```

Version-1.0.9

```
private lateinit var networkDataUploader: NetworkDataUploader

override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    // Initialize SDK for fragment
    networkDataUploader = NetworkDataUploader()
    networkDataUploader.init(this, "MyBL")
}
```

Update Response Object.

In the updated sdk change the parameter name message to response.

Version - 1.0.5

```
data class UploadStatus(
    val isSdkInit: Boolean? = null,
    val isLocationEnabled: Boolean? = null,
    val isPhoneStateGranted: Boolean? = null,
    val dataSaved: Boolean?=null,
    val message: String? = null
)
```

Version - 1.0.9

```
data class UploadStatus(
    val isSdkInit: Boolean? = null,
    val isLocationEnabled: Boolean? = null,
    val isPhoneStateGranted: Boolean? = null,
    val response: String? = null
)
```
